MICRO WIRE MAKES TINY FEATURES FEASIBLE

This week marked the in-house training completion for our 6th and newest Wire EDM machine, an **AGIECHARMILLES CUT 2000S**.

Our expert toolmaker created a sample piece with varying fine wire profiles that included:

- ✓ **.004" WIRE FOR THE (NOT SO) 'ROUGH' CUT**
- ✓ **FINISHED WITH .0019" (.049MM) DIAMETER WIRE**
HALF THE THICKNESS OF A SHEET OF PAPER!
- ✓ **ALL INSIDE RADII AT .002"**

WHEN MICRO MACHINING MATTERS, having the right equipment and skilled toolmakers makes all the difference to your success.

Call us for your next micro project!
