

NPE2024: That's a Wrap

We are grateful to all who joined us at NPE 2024 and took the time to visit us in Sodick's booth. We also wanted to extend our appreciation to Sodick for showcasing our tooling and molding capabilities in their industry leading injection molding equipment.

Throughout the week-long show, we ran our ultra-high precision, award winning micro mold in a high response Sodick LP20EH3 20T Micro Injection Molding Machine. This demonstration highlighted the exceptional precision and repeatability of our custom tooling and injection molding capabilities, showcasing accuracy down to 1/1000 of an inch. Our tool also featured RJG's latest CoPilot and the AI based MAX technologies.

It was a pleasure meeting and engaging with everyone who stopped by to watch this micro mold in action. For those who missed the opportunity to connect with us at NPE, reach out today to explore how our expertise can meet your precision tooling & molding needs.
