

Expanding Capacity With 60-Ton IMM

Matrix Tool, Inc. (Fairview, PA), a trusted partner and strategic supplier specializing in high-precision injection molds and plastic molded components for the electronics, automotive, medical, and micro-molding industries, is excited to announce the addition of a new 60-Ton Injection Molding Machine (IMM) from Sodick-Plustech. This brings our number of Sodick High-Precision IMM's to (17) total, including (14) 20-Ton High Response Micro Molding Machines and (3) 60-Ton High Response IMM's.

This machine provides additional capacity to support ongoing business growth as we continue to deliver complex, tight-tolerance components across a variety of high-precision industries. Matrix Tool remains committed to staying ahead of evolving industry demands by continually investing in the latest technology, equipment, and advanced manufacturing solutions. In addition to standard componentry, this press will further enhance our capability to mold high precision micro-featured products for multi-cavity tools and small shot sizes.
